

## **COMPANY SUSTAINABLE PROCUREMENT POLICY STATEMENT**

The Company recognises that its activities have the potential for both positive and negative impacts upon the environment at local and national levels. They acknowledge their responsibility for environmental protection and also aim to contribute to the national commitment to sustainable development and to national carbon reduction targets. The Company will seek to achieve continual improvement in how it understands and responds to its environmental impacts.

The Company commits itself to:

- Communicate its environmental policy and strategy to all employees and to raise awareness of their own environmental responsibilities and requirement to commit to environmental improvements;
- Reduce its carbon footprint through prudent use of fossil fuels (through energy conservation, management and efficiency within buildings) and to switch to low-carbon fuel alternatives where possible;
- Manage and reduce water consumption;
- Reduce waste created and where possible to reuse and recycle before responsible disposal of surplus materials; to use recycled and recyclable materials wherever possible;
- Integrate principles of environmental sustainability within the Company policies and practices, specifically to those relating to procurement of goods and services;
- Avoid or limit wherever practical the use of environmentally-damaging substances, materials and processes;
- Develop procurement procedures with our supply chain to encourage the objectives of sustainability;
- Investigate process and technological improvements that assist the drive towards greater sustainability.

Progress on implementing all areas of the policy will be reviewed annually by Senior Management within the Company. Review sustainability policy with employees as part of the Company consultation procedures.
